

FACT SHEET – AMERICAN COCKROACH

Latin Name:

Reriplaneta Americana

Description:

Approximately 30-40 mm, dark reddish-brown, pale yellow border and pronotum

Habits:

Likes warm, moist, dark areas such as sub-floors, cellars, roof voids and wall cavities but just as happy to come inside to visit you on warm summer evenings.

Control Methods:

The best control method for American cockroaches is a general pest service to all areas including sub-floor, roof void and gardens.
