

FACT SHEET – AUSTRALIAN COCKROACH

Latin Name :

Periplaneta Australasiae

Description :

Approximately 30-35 mm, brown with yellow border around pronotum and yellow racing stripes on the outer edge of the wings

Habits :

Hangs out in all the best cockroach scenes like sub floors, roof voids, wall cavities, gardens and on a humid night can even fly in through your windows.

Control Methods :

A thorough general pest service to all areas will spell ‘doom’ for these guys and their American allies!
